

## **Postdoctoral Fellow Position in the Tang Polymer Group at the University of South Carolina**

**Biomass chemistry toward sustainable polymers:** A postdoctoral fellow position is available immediately in Prof. Chuanbing Tang's Laboratory at the University of South Carolina.

The research will be focused on biomass chemistry involving depolymerization and polymerization. The candidate will be working with a collaborative team on the elucidation of structure-property relationships toward bioplastics with customized thermal and mechanical properties. The candidate should be proficient in organic synthesis and functionalization. Experience with chemical catalysis is a plus. Some level of background on polymer chemistry is preferred, not strictly required.

Candidates should send their CV and two names of references to Prof. Chuanbing Tang ([tang4@sc.edu](mailto:tang4@sc.edu)).

For the Tang Polymer Group, please see <http://www.tangpolymer.org>
